🏆 She/Her

Summary

Full Stack .NET Developer with hands-on experience in building, debugging, and maintaining web applications. Skilled in C#, ASP.NET Core MVC, SQL Server, HTML, CSS, and JavaScript, and gained experience implementing database-driven applications. Computer Engineering graduate with a strong interest in developing reliable, scalable web applications and continuously growing as a software developer.

Experience

Software Development Intern, *Marmara for Modern Software*

06/2026 – 07/2026

- Trained on ThingWorx and how it's used in developing IoT and fleet-management solutions.
- Debugged and maintained a NopCommerce e-commerce website built using the .NET Framework.
- Investigated application issues, identified bugs, and worked on implementing fixes within an existing codebase.

Projects

Portfolio Webpage

08/2026 – Present

Developed a portfolio website using ASP.NET Core MVC, Entity Framework Core, and SQL Server. The project features a responsive interface with portfolio, resume, blog, and contact sections, along with a protected administration area using ASP.NET Core Identity and role-based access.

Skills

Programming Languages

C#
JavaScript

Frontend

HTML5
CSS3

Backend

ASP.NET Core MVC
SQL Server
Database Migrations
Dependency Injection

Education

Bachelor in Computer Engineering, *University of Jordan*

10/2019 – 06/2024

GPA: 3.67

Awards

Third place in the 11th National Technology Festival, *University of Jordan*

04/2024

Developed a machine learning-based system using Python to classify traffic congestion levels under simulated hazy conditions.
